

COLD WIRE FEEDER

Features:

- Precise and controlled addition of filler metal in TIG Welding
- Helps weld parameters duplication eliminating welder skill .
- Dual Groove Drive Roll system accepts multiple wire sizes.
- Eliminates TIG rod stub loss .
- Cabinet encloses filler wire spool ensuring cleanliness.
- Makes fully automatic TIG welding possible.
- Results are consistent and high quality welds
- Motor Speed Control Adjustments
- Digital display of all parameters and adjustments. All parameters are stored in the system and easily changeable.
- Interconnection to the power source by potential free contacts.

Specifications:

Delay ON motor timer (sec)	0.3 – 20
Motor ON Time (sec)	0.2 – 7
Motor OFF Time (sec)	0.2 – 7
Motor reverse ON timer (sec)	0.1 – 2
Select switch	Pulse / Continuous
Delay ON external timer (sec)	0.1 – 20
Internal external timer (sec)	1 – 240
